

REMOTE ANNEX'S

CAPABILITY STATEMENT

PROTEST
CONSTRUCTION MATERIALS TESTING

ABOUT PROTEST CMT

Protest CMT is a leading provider of construction materials testing services across Australia. Built on a foundation of accuracy, reliability, and responsiveness, our team supports major infrastructure, mining, and civil construction projects with both laboratory and onsite testing solutions.

With extensive experience across metropolitan, regional, and remote locations, we understand the importance of fast mobilisation, efficient delivery, and dependable outcomes. Every test and report is backed by our ISO-certified management systems and NATA-accredited laboratories, ensuring full compliance and confidence from the ground up.

OUR ANNEX CAPABILITIES

When projects extend into remote or logistically challenging regions, Protest CMT brings the lab to you. Our remote annex facilities deliver all the capabilities of a base laboratory, directly to site for exclusive use.

Designed for mining, construction, and infrastructure contractors, these modular setups ensure fast turnaround times, efficient operations, and uncompromising quality.

Each annex is equipped with NATA-accredited testing equipment, mine-compliant vehicles, and experienced technicians who operate to the same standards as our permanent laboratories.

KEY BENEFITS:

- Rapid mobilisation and setup in remote areas
- Onsite testing of soils, gravels, concrete, and stabilised materials
- Dedicated testing teams for each project
- Reduced transport and logistics costs
- Consistent local support throughout the project duration
- Level One supervision and access to specialty testing

With our remote annex solutions, clients gain peace of mind knowing expert testing and quality assurance are always within reach, no matter how remote the site.

FLEET IN FOCUS

Safety is our number one priority at Protest CMT, it's at the core of everything we do.

We genuinely care about our people, our clients and the communities we work in. Our team is committed to achieving zero harm on all projects.

We know that every job site comes with its own challenges, which is why we're always adapting and improving to keep things running safely and efficiently. Our integrated management system brings together clear policies and procedures to support our **ISO 45001** certified Health, Safety and Environment (HSE) Management plan.

By combining this with our **ISO 9001** certified Quality Management framework, we take a proactive approach - minimising risks, preventing accidents, and making sure we have accurate data to keep projects on track.

DELIVERING WITH SAFETY FIRST

Each project brings new insights, allowing us to refine our setups and enhance performance with every mobilisation. Client feedback has been overwhelmingly positive, highlighting clear cost savings, faster turnaround times, and smoother project delivery.

Our fleet continues to grow and evolve, offering configurations to suit projects of every scale:

- Compact trailers for short-term or mobile works
- Mid-sized units for regional and multi-week programs
- Large 40-foot laboratories for extended or high-volume operations

All trailers are fully plug-and-play, designed for quick mobilisation and minimal setup time. Having a dedicated onsite resource gives clients confidence and makes doing business simple and stress-free.
