QUALIFICATIONS

Bachelor of Engineering
(Honours), Majoring in Civil
Engineering (BEng, Griffith)

PROFESSIONAL PROFILE

Justin has over 4 years' experience in the construction industry serving as both a geo-technician & a geotechnical engineer. He is currently performing the role of Geotechnical Engineering Branch Manager at Protest Engineering. Justin is based at Protest's head office in Ormeau, on the Gold Coast, and is leading the geotechnical engineering team at the Gold Coast branch.

Throughout Justin's career, he has established himself as someone who has a widespread knowledge on various areas of the construction industry beyond his amount of experience through his eagerness to learn and dedication to ensuring projects are completed. Justin's current day to day roles and responsibilities include but are not limited to:

- Drafting of fee proposals for clients;
- Managing time and making sure project deadlines are met;
- Organisation and supervision of geotechnical engineers working within his branch;
- Site inspections ranging from bearing capacity assessments and batter inspections to landslide risk assessments;
- Piling supervision & supervision of large drilling rigs, including logging and sampling from boreholes;
- Report writing ranging from site inspection reports to geotechnical investigations; and
- Working closely with a qualified RPEQ engineer to give advice to clients onsite and write reports in a professional manner.

-  0447 316 857

QUALIFICATIONS

Bachelor of Engineering
(Honours), Majoring in Civil
Engineering (BEng, Griffith)

Throughout Justin's career he has been required to perform inspections, supervision & testing on soils, rock, aggregate & concrete. Justin's geotechnical knowledge to date has had to span a wide variety of test methods across both the Australian Standard and Queensland Department of Transport and Main Roads. Justin displays dedication in all work that he undertakes and is currently focusing on increasing his knowledge in the engineering field and increasing the productivity and revenue of the geotechnical engineering branch.

KEY PROJECTS
