PERSONAL PROFILE

Sean has approximately 10 years' experience in the construction industry serving as both a geo-technician & a geotechnical engineer. He is currently performing the role of Sunshine Coast Geotechnical Branch Manager and Geotechnical Engineer at Protest Engineering where he oversees all Sunshine Coast geotechnical engineering projects. Sean is based at Protest's Sunshine Coast office at Bells Creek, Caloundra.

Sean's skills range from but are not limited to supervision and management of ground investigations, site inspections, geotechnical design, soil and rock mechanics, in-situ testing, earthworks supervision and consultation and related disciplines.

Throughout Sean's experiences, his eagerness, practical mindset, positive communication skills and dedication ensure his positive impact across all projects he is involved in.

PROFESSIONAL AFFILIATIONS

- Institution of Engineers, Australia (MIEAust)
- Australian Geomechanics Society

Sean's current day to day roles and responsibilities include but are not limited to:

- Overseeing all earthworks testing and supervision projects from the Pine River and as far North as dictates;
- Supervising and managing a team of two geotechnical engineers and 11 geo-technicians;
- Meeting potential new clients to discuss future opportunities;
- Drafting of fee proposals for clients;
- Site inspections ranging from bearing capacity assessments general earthworks consultations and advice;
- Organisation and supervision of subcontractors;
- Report writing ranging from site inspection reports to geotechnical investigations;
- Staff performance reviews, feedback and toolboxes;
- Meeting and discussion with Gold Coast branch and lab division manager including performance reviews; and
- Discussion with directors ranging from proposed scope expansions to project opportunities.

Throughout Sean's career he has been required to perform inspections, supervision & testing on soils, rock, aggregate & concrete. Sean's geotechnical knowledge to date has had to span a wide variety of test methods, such as AS and QDOT.

Significant Projects

- Caloundra Road to Sunshine Motorway Upgrade (CR2SM – FHSW JV)
- Australia Pacific Liquid Natural Gas Project (APLNG – Bechtel)
- Caloundra South/Aura Subdivision (Shadforths Civil Contractors)
- Parklakes 2 Subdivision (Shadforths Civil Contractors)
- IKEA North Lakes (Westfields)
